

High Heat Retention Storage Heaters on EPC qualifying list at 21/5/2025

Any heater not on the list below will not achieve the level of benefit to the EPC rating that is indicated for a high heat retention storage heater. Actual benefit achieved will vary depending upon the specific model.

List is believed to be correct at 21/5/2025. If referring to this list at a later date, you are advised to check for a more current one if you are considering what you believe to be a high heat retention storage heater not on this list.

Brand name	Model name	Model qualifier	Manufacturer	First Year	Final Year	Storage Capacity	Output Power	Boost Output
Creda	Quantum	CQH 070	GDC Group Ltd	2014	current	11.61	700	630
